Portfolio: ayomide2025-web.github.io

Summary

First-class Physiology graduate with hands-on experience in health data analysis, bioinformatics, and data visualization. Skilled in building dashboards, predictive models, and deploying machine learning solutions. Committed to using data-driven insights to improve healthcare outcomes.

Skills

Programming & Data: Python, R, SQL, Excel

Data Visualization: Power BI, dashboards, report automation

Machine Learning & Deep Learning: Supervised/Unsupervised algorithms, Neural networks

Bioinformatics: Linux tools, FASTA/FASTQ, sequence alignment, variant analysis

Design: Adobe Photoshop, Illustrator, Canva

Experience

DataLab Analytics / power BI Developer

JUNE 2025 - PRESENT, REMOTE

- Design, build, and optimize interactive dashboards to deliver actionable insights.
- Streamline data pipelines and ensure data integrity for real-time analytics.
- Enhance user experience through clear visual storytelling and intuitive reporting.

DataLab Analytics / Health data & Bioinformatics Analyst

JANUARY 2025 - APRIL 2025, REMOTE

- Built predictive models using machine learning algorithms in Python and Excel.
- Developed and deployed a lung cancer risk prediction web app with Streamlit.
- Presented findings and recommendations to cross-functional teams for informed decision-making.

Education

Osun state university / Physiology

AUGUST 2019 - AUGUST 2023, OSUN STATE, NIGERIA.

DataLab Analytics / Health Data Analysis and Bioinformatics Training

JANUARY 2025 - APRIL 2025, REMOTE INTERNSHIP

Awards

First Class Honours Graduate, Osun State University — Graduated top of class in Physiology.
